GAMEPLAY TIME

A game of single combat with a time-travelling twist

STEP 1

PLAYER 1 VS PLAYER 2

Take out all the duplicates and bonus cards. Shuffle the pack and deal 20 cards face down in a pile to each player.

Player 1 calls out a category at random – for example, Agility – before turning over the top card from their pile.

Player 2 places their card next to it. Whoever's score is highest wins the round. But...

PLAYER 2 LOSES!

SHIFT!

STEP 2

Player 2 has another chance! They can save their card by using an emergency Time Shift that sends it to the bottom of their pile.

Player 2 then plays their next card instead.

REMEMBER!
If your card loses, but is strong in a different area, then Time Shift it!

TOP TIP!
Don't waste Time Shifts on weak cards – let your opponent have them!

STEP 3

If player 2 loses again they must surrender their card to player 1.

If they win, player 2 collects player 1's card – unless player 1 decides to use a Time Shift too!

Whoever wins gets to choose the next category. The game continues until one player has all the cards.

WARNING!
You can only use five Time Shifts per player! So make sure you only save your very best cards from capture

PLAYER 2 WINS!

FAQ EPISODE 25

FEAR HER

The Doctor and Rose visit the London Olympics and find a little girl possessed by an alien!

Q Which episode is this?
The TARDIS lands in the year 2012, where children have been vanishing from the streets. The Doctor works out that little Chloe Webber is making them all disappear!

Q How is she doing that?
Chloe sits in her bedroom all day drawing with crayons – and everyone she draws is transported into the pictures! The Doctor works out that she's using ionic energy to send people to a make-believe dimension!

Q What is the Isolus?
A tiny alien child that has been separated from its brothers and sisters. The Isolus hates being alone and took control of Chloe so it could collect lots of new friends.

Q What's that big ball that attacks Rose?
It's a scribble monster! Chloe also has the power to bring some of her drawings to life.. This big angry doodle was made of graphite, the same material used in pencils!

Q Why does the Doctor run with the Olympic torch?
To launch the Isolus back into space so it can rejoin its family. The alien's pod needed the heat of the huge Olympic flame to power it up.

Q Who's the scary man in Chloe's closet?
A drawing of Chloe's horrible dad that comes to life! He comes to attack her after the Isolus leaves her, but disappears when Chloe and her Mum sing a happy song.

"I'm coming to hurt you!"

BEHIND THE SCENES

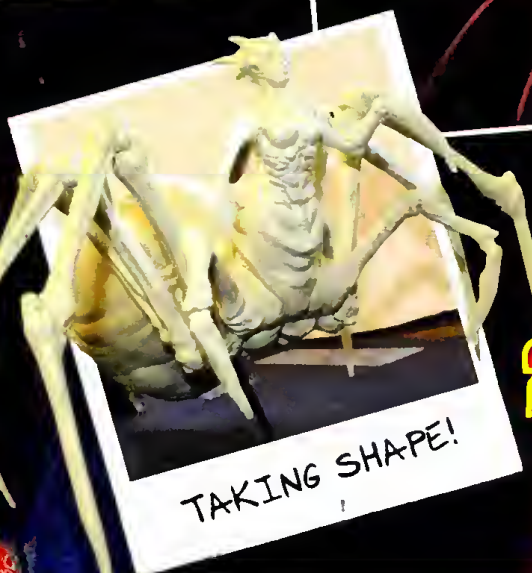

RACNOSS EVOLUTION!

We take you step-by-step through the life cycle of the spidery Racnoss Empress!

DESIGNING THE MONSTER

1 In the script for 'The Runaway Bride', the Empress was described as 'half-human, half-spider', so the first thing the effects team came up with was some concept art. This spooky early design made her look a bit like Donna, complete with cobwebby veil!

MAKING THE MODEL

2 Once a design had been chosen, the team at Millennium FX built this fantastically detailed clay model. The full-scale costume would be made of fibreglass, but the team can use the model to work out the dimensions for the final monster.

MONSTER MAKEOVER

3 The actress Sarah Parish spent hours in the make-up chair being transformed into the Empress, as the huge and terrifying beast was put together on location. The final costume weighed half a tonne and was incredibly uncomfortable for Sarah to wear!

IN THE SHOW

4 Here's the Racnoss Empress as she appeared on TV! While Sarah gnashed her fangs and waved her razor-sharp 'hands' about, four technicians worked the Empress' eight legs like a massive puppet! Other big baddies, like the Beast and the Lazarus Creature, were created using computer generated imagery (CGI), making the Racnoss Empress the show's biggest prosthetic monster yet!

DID YOU KNOW?

When the art department were busy designing the Empress model, their studio was invaded – by hundreds of tiny, real-life spiders!

SUN-POSSESSED

STARS IN THEIR EYES!

The Doctor and Martha have just 45 minutes to prevent the SS Pentallian from falling into a sun! And to make matters worse, the sun is alive and starts taking over some crewmembers and burning others to dust! 41 minutes, 58 seconds and counting ...

ABI

Abi is the Pentallian's medical officer. She's the first to get fried by the sun – and ends up as just a shadow of ash on the wall!

SCANNELL

Orin Scannell is one of the ship's engineers. When Sun-Possessed Korwin sabotages the engines, Orin nearly gives up hope! But then the Doctor and Martha turn up to kick-start him into action!

RILEY

Riley Vashtee and Martha have to get through 29 password-sealed doors before they can activate the auxiliary engines! It's a tough job and the two become close – Martha even gives the lad a kiss at the end!

THE DOCTOR

When Martha's escape pod falls away from the Pentallian, the Doctor has to put on a space suit and risk his life to save her! He manages to activate the ship's magnetic field, but not before the sun invades his mind and his body!

McDONNELL

Kath McDonnell is the ship's tough captain. Everyone blames her for what's happening because she plundered the living sun without thinking! She sacrifices herself to kill Korwin and the two are left spinning through space to a fiery death!

SS PENTALLIAN

McDonnell's ship is a huge cargo vessel crewed by just seven humans. It's pretty old and rusty, but luckily its heat shields are strong enough to protect it from the living sun's intense, burning glare.

ERINA

Erina went to fetch some tools from her locker – but Korwin wasn't far behind!

KORWIN

Korwin and McDonnell are married and have worked on the SS Pentallian for 13 years. The angry sun took him over first, and he tried to murder his own wife!

ASHTON

This engineer was the second crewmember to have the burning sun get under his skin!

TOP 10 SUN-POSSESSED FACTS

1. This sun is a living organism, like a human being.
2. It's in the Torajii system, half a universe away from Earth.
3. The SS Pentallian used an illegal fusion scoop to rip out the sun's heart.
4. The Sun-Possessed kill their victims using light from their eyes!
5. They can also use their burning hands to destroy people.
6. A stasis chamber can freeze the sun out of its host – but the host dies!
7. All the sun wants is for the Pentallian to give back the sun particles it stole.
8. The Sun-Possessed have body temperatures of a boiling 100 degrees!
9. When they vaporise people they leave nothing but ash!
10. Not even the Doctor could stop the sun from taking over his body.
